

Quality and Safety Manual

Veritas Forge Industries Ltd

CHANAKYA Demonstration Dataset - synthetic data for a fictional company. Not real.

1. Quality Policy

The company-wide defect rate is defects divided by units produced. The target is below 2.5 percent. Corrective action is raised for any line exceeding 3.0 percent in a quarter.

2. Quarterly Defect Rate

Defect rate rose from 2.4 percent in Q1 to 3.1 percent in Q2, the highest of the year, coinciding with the Q2 volume increase and Line B downtime.

2.1 Plant Defect Rate

Metric	Q1	Q2	Q3	Q4
Defect Rate (%)	2.4	3.1	2.8	2.5

2.2 Defect Causes by Quarter

Root Cause	Q1 defects	Q2 defects	Q3 defects	Q4 defects
Tool wear	307	459	430	406
Setup error	237	356	333	314
Material variation	178	267	249	235
Operator error	148	222	208	196
Measurement error	119	178	166	157

3. Root Cause Analysis

The Q2 defect increase was traced to tool wear, operator onboarding on the second shift, and insufficient first-article inspection on Line B. Corrective actions are tracked to closure.

4. Safety Performance

There were 3 recordable incidents in FY2025 versus 7 in FY2024. All employees complete safety induction before floor access.

4.1 Safety Metrics

Metric	FY2024	FY2025
Recordable Incidents	7	3
Safety Training Completion (%)	91	99

5. Lot Sampling Inspection Records

Sampling inspection results for 1,000 lots. Sampling defects are inspection findings and are distinct from the plant defect counts in the production report.
